Hygiene and Health at RMYS

Hello Members,

The world health situation is very real so we have taken some basic action to ensure RMYS remains a healthy and safe environment for members, staff and visitors. The cleaners will sanitise all “high touch points” daily, these include door handles and plates, the members bar top, table tops and benches in the members bar and various other points. Specific points in the Harbour Room will be cleaned after events.

Hand sanitiser dispensers will be installed in the toilets, office area and reception, hopefully they will be in by the weekend although sourcing them is proving difficult. Please use them regularly when you are in the building.

It is business as usual at RMYS so please continue to enjoy sailing and coming to the club, however if you have travelled or been in contact with anyone who has flu like symptoms it would be good to seek medical advice before you do.

This link is to the Victorian Government Coronavirus website which is a useful source of information.
